

ICS20 Course Outline 2022-2023

The course covers the following topics:

- Computer programming
- Careers in Computing
- Computer Hardware
- Professional and Ethical Standards in Computing
- Computers and the Environment
- Essential computer-operation skills

Here is the grade breakdown of the course:

- 70% Term work (tests, assignments, presentations, quizzes)
- 30% Culminating activity (summative assignment)

Students will have in-class work most days. If they are unable to complete that work during class time, it becomes homework.
